

INTERNATIONAL PHOTO COMPETITION 2018

Photographer Wanted!!!

Are you still in school and have thought of taking part in a great international project? Then you should participate in our this year's mathematical photo competition! It doesn't matter which grade or country you are from, each student is allowed to join in. Our motto is:

"Mathematics doesn't know any frontiers"

We, the team of the Mathematics experimental workshop of the Martin Luther University Halle-Wittenberg (Germany), would like to invite you to see the world with undivided attention through mathematical "lenses" and to discover mathematical connections. Symmetries, angles, perspectives, etc. — discover the beauty of mathematics in your everyday life! We want to prove that mathematics can be found in every spot of the world, whether in buildings, blocks, streets, plants, animals, or in art, etc. There are no limits for your creativity.

Requirements:

- Send us your photos (max. 3), on which you can see something mathematical.
- Tell us *where* exactly mathematics is on your photo and *why* you feel that the photo is interesting in a mathematical way.
- Tell us your personal story about it. For example:
 - Where are you from? (city, country)
 - How old and from which grade are you? (You can also send us a picture of you with parent permission)
 - When and why was the photo taken? (city, country)

Rules:

- The photo has to be shot by yourself.
- Photos from other sources are excluded from participation in our competition.
- Remember to sign the attached application form and return it.
- Send us your entry and other questions to experimentewerkstatt@mathematik.uni-halle.de.

Deadline: May 31st, 2018

Prizes:

The best photos are published on our website, Facebook, and Instagram and will be part of our gallery in the Mathematics experimental workshop of the Martin Luther University Halle-Wittenberg (Germany). For the best submissions there will be a special price!

Grab your camera or your smartphone and look for something mathematical in your surroundings! We can't wait for your photos!
